STATEMENT OF FACTS (begin here):

Your Honor, I respectfully request that this citation be dismissed based on the statement as set forth herein. Moreover, kindly accept this correspondence as my formal plea of not guilty.

On November 23, 2016, I was traveling eastbound on the XYZ Road. On said day and location, I was pulled over by an Officer and cited for violating California Vehicle Code Section 22349(b). I do not believe that I exceeded the speed limit as alleged by the officer.

Explain the reasons for which you believe the ticket should be dismissed. The explanation must be clearly written with factual, technical or legal arguments to justify the dismissal of the ticket.

In order to formulate a CVC 22349(b) defense statement, it is important for the defendant to first determine the method of enforcement.

Here are the speeding ticket enforcement methods:

1. Radar
2. Lidar
3. Pacing
4. MVARs
5. Visual Observation
6. Airplane

Each of these enforcement methods has a different defense strategy. Basically, the defendant must have enough knowledge about each of these enforcement methods to prepare a clear statement and identify the reasons for which the speeding ticket should be dismissed. Obviously, an argument that can prove the enforcement method generated an erroneous determination of the speed of the target vehicle can be very effective in court. However, to clearly show an erroneous speed detection in addition to the necessary knowledge about the enforcement method, it is important to find in accuracies that may be unique to the ticket such as; location of the violation, roadway condition, officer's line of sight, traffic conditions, weather and etc.
